Location: Florida | Open to Remote, Hybrid, or On-Site Roles

Professional Summary QA Engineer with a foundation in front-end development and a focus on delivering functional, usable, and accessible software. Since graduating in May 2025, I've built real-world QA projects, applied modern testing frameworks, and created test strategies that integrate seamlessly with development workflows. Skilled in Cypress, Postman, and CI/CD automation, with additional experience in UI/UX testing, accessibility audits, and Agile team collaboration.

Skills

- **Testing Tools:** Cypress, Postman, Playwright (learning), GitHub Actions
 - **Front-End & Design:** HTML, CSS, JavaScript, Figma, Adobe XD (basic)
 - **QA Practices:** Manual/automated testing, test cases, accessibility, regression testing
 - **Dev Tools:** Python, Next.js, Tailwind, Agile, Jira, Scrum, user stories
 - **In Progress:** SQL, Security QA, Pytest
-

Highlighted Projects

- **QA Practice Project – Functional & UI Testing**
Built and maintained a QA-focused repo to simulate test workflows. Wrote manual test cases, created Cypress UI automation, conducted accessibility audits (Cypress-Axe), and integrated CI using GitHub Actions.
- **UI Automation – Personal Blog**
Created an automated test suite for a blog using Cypress. Validated layout, navigation, and form behavior. Logged visual bugs using Figma audits. Implemented GitHub Actions for CI.
- **Software Test Automation – CS-320**
Wrote unit tests, reviewed code for bugs and vulnerabilities, and applied secure design principles like input validation and access control.
- **Agile Development – CS-250**
Led sprint-based projects, wrote user stories, and translated user needs into working features. Focused on team communication and adapting to requirements.

- **Mobile App & Full Stack Projects**

Built a mobile weight tracker app with SQLite + SMS notifications, and a full stack Angular/Express web app with a MongoDB backend. Focused on usability, modular design, and secure data handling.

Education B.S. Computer Science – Southern New Hampshire University

Graduated: March 2025

Additional Notes

- Open to junior, QA, and SDET opportunities with a focus on creative or design-driven products
- GitHub portfolio and example projects available upon request or at github.com/JunoDotNet
